

Dead Skin

~~~~~

There was one thing that  
I was always wondering about.

I regularly scrub my body  
with a special scrub towel that  
I got from Korea.

In western countries,  
people use a scrub cream or gel.

Ah- Feel so fresh-  
A deep scrub is  
the best

But I definitely prefer the Korean scrub  
than any other method.

So, my curiosity  
NOT...

Men's never scrubbed  
his body like I do.

I wonder how much  
dead skin he would  
have now?

One day

Sorry, Mom. Can I  
brush my teeth?

OK

Brush  
Brush

I saw Merv was in the both tub.

I really wanted to get  
an answer for my curiosity.

I grabbed my scrub towel quickly.

So I started to rub  
the towel excitedly.

Nothing came out.

How is this possible?

He was in the warm water for so long. His dead skin should have been ready to come off.

I was surprised.

Alright  
It hurt!

So I tried to get some dead skin  
from where it usually comes off well

Finally what I got was  
just a few white dead skins.

Come on.  
He didn't scrub for  
30 years... But  
how?

I was shocked.

Max. Listen  
to my song~

I'm clean  
Lelelele~

You're dirty-  
You never scrub~

Come on,  
I'll make your  
skin new today

Don't be shocked  
when you see what  
your skin has

Curiosity, nicks.
